If you're into music and sound design you can't miss this one, think about a VR Reaktor...
devs are active and updates are coming quite fast, they list to the community so thumbs up and full support!. The most fun I've ever had taking a hearing test! -seriously, really neat sound sandbox. Edit 02\/10\/2018: Since I wrote this review initially, the dev has actually created a method of movement that allows us to play the game without having to have an open room. This makes everything within reach.

Original Review Below:
It's actually really cool, but I really do wish there was a way to move without needing roomscale, as this game seems to place every function riiiiiight where my IRL bookshelf is. Right now, I can see that it's super cool so I'll give it a thumbs up, but for me to actually play this, I think I'll need to get an open room to play in.. Fun little music sandbox, if you like music and\/or logic I'd definitely recommend giving this a try - enjoy building up 'circuits' to power your beats.. Early days, but a pretty fantastic audio experimentation interface :)

basically PD in VR. Super lovely, way underrated.. This is simply amazing! Add this to the list of "Things I Didn't Know I Needed in VR But Totally Do!"
